Implementation Notes

React Component Structure

State Management

- Plain Text
- Widget state (closed, compact, expanded)
 - Conversation state (messages, files)
 - UI state (loading, error, success)
 - User state (authenticated, preferences)
 - Settings state (model, temperature, etc.)

Performance Considerations

- Lazy load messages (pagination)
 - Virtual scrolling for long lists
 - Debounce search input
 - Cache API responses
 - Optimize re-renders with React.memo
 - Code splitting for widget vs. dashboard
-

Animation Guidelines

Transitions

- **Widget open/close:** 300ms ease-out
- **Expand/collapse:** 400ms ease-out
- **Message appear:** 200ms fade-in
- **Button hover:** 150ms ease-out
- **Loading spinner:** Continuous 1.5s rotation

Micro-interactions

- **Button press:** Scale 0.95 on active
 - **Hover effects:** Slight shadow increase
 - **Input focus:** Border color change + shadow
 - **Success feedback:** Green checkmark animation
 - **Error feedback:** Red shake animation
-

Testing Checklist

- ☐ Widget opens/closes smoothly
- ☐ Expand/collapse works on all screen sizes
- ☐ Messages send and receive correctly
- ☐ File upload works for all formats
- ☐ Edit functionality works

- ☐ Copy to clipboard works
- ☐ Dashboard loads conversations
- ☐ Search and filters work
- ☐ Responsive design on mobile/tablet
- ☐ Keyboard navigation works
- ☐ Screen reader compatible
- ☐ Performance acceptable (< 2s load time)
